

Important Regarding State Farm Case

There is no formal case document (like EY's for example). State Farm wants you to create a presentation on a strategy explaining how and why State Farm can comply with the attached regulation, 23 NYCRR 500 (attached). You will present as you always do - you are a consulting team hired to help a company, in this case, State Farm. You can give your consulting firm a name (professional name). You should research and then develop a strategy for successful compliance including a timeline and budget. You will be presenting to State Farm professionals who will be role playing members of State Farm's leadership team, including the CEO (<https://www.statefarm.com/about-us/leadership-team>). We will not have a pre-case meeting as I want to see what your strategies are and how you apply what you've learned this semester. However, I've put a link in the State Farm folder to get you started. Here's the link I posted: <https://blog.rsisecurity.com/breaking-down-the-requirements-for-23-nycrr-500/> and another link with useful resources (https://www.dfs.ny.gov/industry_guidance/cybersecurity). Also I've attached and posted a thought piece by , MIST 5770 (our class) alumna and Senior Manager with Johnson Lambert.

Keep up the excellent work you've been doing. You have the knowledge and tools to ace this presentation. —
Dr. H.
